

### Product Overview

This gasoline engine section demo model (BT-09GE) is designed to demonstrate the internal structure and working process of an electronically controlled gasoline engine. The cutaway engine with different colored components clearly shows the operation of pistons, valves, and crankshaft. It is driven by a single-phase gear reduction motor and mounted on a movable steel framework with wheels for easy operation and training purposes.

### Technical Specifications

- Dimensions: 800 x 600 x 1200 mm (L x W x H)
- Drive motor: Single phase, AC220V, 120W,  $\leq 100$ rpm or suitable
- Engine: 1NZ gasoline engine
- 4 Cylinders, 1000 ~1300 CC
- The engine is cutaway to show the internal structural of the offered gasoline engine.
- Different parts are colored differently; it can demonstrate the working process of gasoline
- Year of Manufacture: 2026
